Mrs. Edith Walsh-March  
President  
Titchfield High School Alumni Association  
South Florida Chapter

Dear Mrs. Walsh-March

The Adopt-A-Class Programme allows for direct impact on the students at Titchfield High School and provides an opportunity for interaction between current students and past students and other sponsors. It serves as a welcome reminder that generosity still abounds in the hearts of many here at home and abroad.

We are firm advocates of the view that an improved physical environment can result in vast improvement in students' behavior as well as their academic performance. We are happy to say that our records have indicated an improvement in these areas since the implementation of the Adopt- A-Class Programme.

While we are cognizant that other factors would have influenced these improvements, there is no doubt about the impact of the programme. Our students have displayed greater self control, self-respect and awareness for the cleanliness of their environment while attaining better grades.

I use this opportunity to wholeheartedly thank the association and all the Sponsors - Past Students and otherwise for your support for this venture. We are well aware that many persons made a significant sacrifice and that there are many competing charities for your limited resources. We are therefore sincerely grateful that we were considered to benefit from your generosity at this time.

On behalf of the Board of Governors, Staff and students of Titchfield, I wish for you and your members, good health and God's continued blessings.

Yours truly

  
Richard Thompson  
Principal
